Bamboo  
Collection

# Boutique Manufacturer of Luxury Door, Cabinet & Window Hardware

For decades, Brassart has specialised in the design and manufacture of contemporary solid brass door hardware for some of the most discerning residential and architectural projects around the world. Our products are perfectly suited for private residences, boutique hotels, high-end hospitality environments and many other design-led interiors where quality, material integrity, and refined design are essential.

Established in England in 1935, Brassart combines traditional British craftsmanship with modern manufacturing techniques to produce exceptional door hardware. Each piece is crafted from solid brass, chosen for its strength, longevity and distinctive character, and designed to elevate contemporary architecture and interior design.

The Bamboo range of architectural ironmongery is a distinctive collection that draws inspiration from the organic form and texture of natural bamboo, reinterpreted in finely crafted solid brass. Designed to bring a sense of elegance and subtle ornamentation to interiors, the range includes items such as pull handles, knobs and cabinet hardware, all available in a wide variety of bespoke finishes. Like all products, the Bamboo range is made to order and combine traditional craftsmanship with precision engineering, resulting in durable yet decorative hardware suited to luxury residential, hospitality and heritage projects.

Our aim is simple: to create contemporary solid brass door knobs made in the UK that combine enduring materials, precision engineering, and understated design.
