Collection*

# Boutique Manufacturer of Luxury Door, Cabinet & Window Hardware

For decades, Brassart has specialised in the design and manufacture of contemporary solid brass door hardware for some of the most discerning residential and architectural projects around the world. Our products are perfectly suited for private residences, boutique hotels, high-end hospitality environments and many other design-led interiors where quality, material integrity, and refined design are essential.

Established in England in 1935, Brassart combines traditional British craftsmanship with modern manufacturing techniques to produce exceptional door hardware. Each piece is crafted from solid brass, chosen for its strength, longevity and distinctive character, and designed to elevate contemporary architecture and interior design.

The Princess range of architectural ironmongery is a distinguished collection inspired by the elegance and symmetry of the Regency period, reflecting the refined classical influences of late Georgian design. Characterised by balanced proportions, restrained ornamentation and timeless detailing, the range includes door handles, knobs, pull handles and cabinetry, all handcrafted in solid brass and available in an extensive selection of traditional and contemporary finishes. Designed to authentically recreate period interiors while remaining versatile for modern applications, the Princess range combines historical accuracy with exceptional craftsmanship, making it particularly well suited to heritage restorations and high-end residential projects.

Our aim is simple: to create contemporary solid brass door knobs made in the UK that combine enduring materials, precision engineering, and understated design.
